

Dossier prescribes the perfect competency platform for the Pharmacy team at MedStar St. Mary's Hospital.

Diagnosing MedStar St. Mary's problem

The hospital's Pharmacy Department did not have a centralized digital system that made the management of staff competencies and resources efficient. Without this, they wouldn't be able to focus on innovative technology and their dedication to quality care and patient safety.

How Dossier got MedStar St. Mary's Hospital up to speed

Dossier helped the Pharmacy team at MedStar create a cloud-based competency assurance solution that allowed staff to access and update needed information from anywhere. Even with the pandemic, it only took about 2 weeks to implement. The feedback so far has been very positive, and as one employee said, "[I] absolutely love it!" and "[It is] easy to access documents."

Proud to have been chosen to work with the MedStar St. Mary's Hospital Pharmacy team, Dossier's COO, Roger Lee, said, "We look forward to working with the rest of the MedStar organization to help them drive improved outcomes through high-quality, competent patient care."

About MedStar St. Mary's Hospital

Nestled in the waterside community of Leonardtown, Maryland is MedStar St. Mary's Hospital, a full-service organization that delivers state-of-the-art emergency and acute inpatient and outpatient care while continuously promoting, maintaining and improving health through education and services.

"I am thrilled that I have all my staff competencies in one place and can view the dashboard to see where every staff member is in their journey to completion."
