National Academic Clinical Nurse Educator Program

An interactive Clinical Nurse Educator platform, designed to standardize excellence, deliver and measure evidence-based teaching and learning principles, and provide a scaled foundation for nurses aspiring to be clinical educators across a variety of settings.

OpusVi (Latin for Workforce) partners with healthcare organizations and academic institutions to build transformative workforce solutions. Dedicated to providing the best experience, we have designed custom online and hybrid programs that improve and positively impact patient health and quality of care. We remain leaders in the healthcare education space by creating scalable, cutting-edge solutions through innovative technologies, clinical expertise and evidence-based training alongside the industry's top subject matter experts.

The National Clinical Nurse Educator Program integrates best practices of teaching and learning to deliver a robust professional development program that meets organizational and individual needs of nurses aspiring to be competent clinical nurse educators.

OpusVi's platform provides a complete solution, allowing your nursing workforce to build skills and confidence while encouraging your leaders to identify problems and intervene with real-time data.

What's Included

Data collected throughout the program provides unique visibility into a nurse preceptor's journey, allowing each system to identify and analyze areas of opportunity.

- Improve Clinical Faculty Retention
- Increase Role Satisfaction
- Promote Well-being
- Ensure Competency and Quality Outcomes
- Provide Professional Role Clarity and Development

Leveraging Evidence-Based Competency Domains

The program is aligned with the National League for Nursing's Certified Nurse Educators-clinical (CNEcl) credential, allowing academic programs to demonstrate the excellence and rigor of preparation and training of adjunct clinical faculty. This program is designed to develop the following competencies:

- Function within the Education and Health Care Environment
- Facilitate Learning in the Health Care Environment
- Demonstrate Effective Communication and Collaboration
- Apply Clinical Expertise
- Facilitate Learner Development and Socialization
- Implement Effective Assessment and Validation Strategies

Unique Insights Include:

- Clinical Nurse Educator Performance
- Work Environment
- Competency Assessment and Validation
- Predictive Retention Rates of the Clinical Nurse Educator

What's Included for Participating Sites:

- Step-by-step implementation framework and support
- Clinical nurse educator platform for educators, lead faculty and administrators
- Digital Badging infrastructure and metadata
- Clinical nurse educator training and professional development pathway
- Reporting, analytics, and deep insights via our proprietary Impact Dashboard.
- Repository for accreditation reporting and insights
- Integration with LMS and digital resource

National Clinical Nurse Educator Learning Outcomes:

Module I:

At the completion of this learning module, participants will recognize the clinical nurse educator's identified core competencies and best practices for teaching and learning in the context of the healthcare environment.

Module II:

At the completion of this learning module, participants will apply clinical expertise and professional role competencies to foster positive learning environments and effectively assess and evaluate the student nurses' achievement of learning outcomes.

Module III:

At the completion of this learning module, the participant will effectively communicate, in various situations, to coach, inspire and meet the individual learning needs of the student nurse.

Module IV:

At the completion of this learning module, the participant will role model self-care and create concrete strategies to support the nursing student's motivation, professional behavior, time management, prioritization and delegation.
